Bad News FROM PITHOLE.—It will be seen by our special despatches from Pithole City, that the Grain well (No. 19) has tapped the "Old Homestoad," and the latter has caused flowing.—This is the first bad news we have had from Pithole, and will occasion some sensation among oil operators on the Creek. The Homestoad was been will be a long to the little of the little but afterwards yielded an increased amount, and had reached 500 barrels per day. It was the well in which Wilkes Booth owned a thirtieth interest, and it is barely possible that he has topped it at the lower end.

The Grant well took fire, as our readers will recollect, at the time it was tubed, and subsuquently incressed its flow from 200 to 900 barrels. Since the stoppage of the Homestead it is eporied at 1,050 barrels.
